

Author: Assoc. prof. dr. **GAFTA DAN CĂLIN**

Habilitation thesis title: ***Ecological drivers of plant species abundance and composition in forest communities***

Domain: **Sylviculture**

PUBLICATIONS LIST

RELEVANT PAPERS (limited to the field of Sylviculture)

- Gafta D., Peet R.K., 2020. Interaction of herbs and tree saplings is mediated by soil fertility and stand evergreenness in southern Appalachian forests. *J Veg Sci* 31: 95-106.
- Russo G. Pedrotti F., Gafta D., 2020. Typology and synecology of aspen woodlands in the central-southern Apennines (Italy): new findings and synthesis. *iForest* 13: 202-208.
- Goia I., Gafta D., 2019. Beech versus spruce deadwood as forest microhabitat: does it make any difference to bryophytes? *Plant Biosystems*, 153: 187-194.
- Pedrotti F., Gafta D., 2017. Floristic differentiation between mid-seral communities of abandoned charcoal kilns in the forests of the Gargano Promontory (south Italy). *Turkish Journal of Botany*, 41: 265-272.
- Gafta D., Crișan F., 2010. Scaling allometric relationships in pure, crowded, even-aged stands: do tree shade-tolerance, reproductive mode and wood productivity matter? *Annals of Forest Research*, 53(2): 141-149.
- Gafta D., 2006 – Eco-coenotic distinctiveness of an extrazonal ‘Ice Hole’ biotope in the valley of Cembra (southern central Alps, Trentino). *Polish Botanical Studies*, 22: 195-206.
- Horj P., Gafta D., Groza G., 2006 - Residual ash-maple forest stands in the valley of Vaser (Vișeu forest district): typology and importance for phytodiversity conservation. *Anale ICAS*, 49: 15-29.
- Horj P., Gafta D., 2006 - Spatial structure and dendrometric architecture of an ash-maple forest stand on the valley of Vaser (Vișeu forest district). *Revista Pădurilor*, 3: 20-26.
- Schnitzler A., Closset D., Gafta D., Cristea V., Schwoehrer C., 2004 - Population dynamics and stand mosaics in protected natural beech-fir forests. A comparison between Vosges and Carpathians. *Revue d'Ecologie (Terre et Vie)*, 59: 213-228.
- Michalet R., Rolland C., Joud D., Gafta D., Callaway R.M., 2003 - Associations between canopy and understory species increase along a rainshadow gradient in the Alps: habitat heterogeneity or facilitation? *Plant Ecology*, 165: 145-160.
- Gafta D., Incze R., Poliță M., 2002 - The influence of forest site fertility and sampling scale on species-area curves. *Contribuții Botanice*, 37: 73-83.
- Gafta D., 2002 – The anthropo-zoogenic influence on peri-urban forests. In: Cristea V., Baci C., Gafta D. (eds.), *The city of Cluj-Napoca and the peri-urban area. Environmental studies*, pp. 241-274. Editura Accent, Cluj-Napoca.
- Pedrotti F., Gafta D., 1999 – Syntaxonomy and distribution of some deciduous forests in Trentino-Alto Adige. *Documents Phytosociologiques*, 19: 495-508.
- Gafta D., 1997 – The anthropogenic impact and its effect on primary forest communities. *Studii si cercetari (Șt. Naturii), Bistrița*, 3: 249-254.

Gafta D., 1994 – Typology, synecology and synchorology of the fir forests in the Alps of Trentino. *Braun-Blanquetia*, 12. Centro Stampa, Universita' di Camerino. 69 pp.
