Academy member Dimitrie I. Mangeron

– 110 years from birth –

Professor Dimitrie Mangeron probably represents the most famous person from local university and academic life, especially due to his scientific work, strongly connected to the requirements of high level technical education. He was an active member of several scientific societies of mathematics, theoretical and applied mechanics, and astronomy. The distinguished professor was doctoral advisor for more than 30 PhD theses in the field of technical mechanics.

An important legacy is related to the Bulletin of the Iași Polytechnic Institute (1946), being a founding father along with other famous scientists and Nobel Prize winners, and contributing to its dissemination on national and international level.

His main scientific research area was concentrated in Partial Differential Equations, with an impressive number of publications in prestigious journals. Today there are mathematical tools named Mangeron polyvalent equations, Mangeron interpolation operators, Mangeron theorems and Mangeron equations.

Professor Dimitrie Mangeron was member of Faculty of Mechanical Engineering in Iași Polytechnic Institute, teaching Theoretical Mechanics and Higher Mathematics from 1948 to 1976.

His valuable scientific activity was acknowledged internationally, being included in numerous societies and committees. In 1990, The Romanian Academy extended a correspondent membership, as a recognition of his distinguished professional career.
