- SUCCESSFUL ALUMNI – LOREDANA VASILE

OPENING OF THE 2025-2026 ACADEMIC YEAR AT TRANSILVANIA UNIVERSITY OF BRAŞOV

Braşov academic community inaugurated the 2025-2026 academic year on 1 October, in a festive setting attended by guests of honour, representatives of the local and county administration, socio-economic and cultural partners, academic teaching personnel, students, together with their families and close acquaintances.

They were all welcomed in "Sergiu T. Chiriacescu" Conference Centre of Transilvania University on the *Gaudemus Igitur* anthem tunes, which heralded the beginning of a new educational cycle within the greatest and best-performing institution in the Centre region. "The new academic year is a beginning full of hope and responsibility, a moment of thrill for the students, as well as the academic teaching personnel's promise to keep forming generations of professionals apt to change not only their own future, but also of everyone around them", Prof. Dr. MD Liliana Rogozea, Vice-Rector for Public Relations, emphasised.

5,370 students started their academic training at UNITBV, with 4,193 of them in the full-time form of education. They were joined by 2,039 graduate students and 140 doctoral students of Romanian origin, in the junior year as well, all of them eager to strengthen the knowledge in their fields of interest. Internationalization and diversity are core attributes for the academic community of Braşov, as highlighted by the 158 international students coming from 41 countries, who opted for the bachelor's, master's and doctoral programmes or, for the time being, the Romanian language preparatory year. Other 93 students under the "Romanians everywhere" category, from four countries, also integrated into the UNITBV community.

A moment of special appreciation was dedicated to BlueStreamline car-racing team, consisting of 33 students and their coordinator, Assoc. Prof. Dr. Mihai Comşa. They were invited on stage alongside the Rector

of our University, Prof. Dr. Eng. Ioan Vasile Abrudan, to be congratulated and honoured for their outstanding performances in the international competitions. BlueStreamline team took the podium in all competitions attended under the combustion class, and achieved notable results with their first electric single-seater.

In his address, the Rector of Transilvania University of Braşov, Prof. Dr. Eng. Ioan Vasile Abrudan, emphasised: "I would like to thank our partners, represented here, institutions and companies in the region of Braşov, and assure them that we will keep developing projects together for the benefit of both parties. Moreover, we will get actively involved in the initiatives of Braşov County Council and City Hall, which our University contributes with its expertise and professional capabilities."

During the event, the floor was taken by Mihai-Cătălin Văsii, Prefect of Braşov County, Adrian Veştea, President of Braşov County Council, and George Scripcaru, Mayor of Braşov Municipality. They praised UNITBV's role in stimulating knowledge and scientific progress, and emphasised the importance of the best relations of the local and regional entities with the university.

The ceremony continued with a musical interlude performed by the artists Zsombor Filip and Izabella Măthé, representatives of the Faculty of Music. The event ended in yet another festive touch, the tunes of the Choir of the Faculty of Music, under maestro Ciprian Cucu's baton.

UNIVERSITY OF HYOGO (JAPAN) AND UNITBV – A COLLABORATION AGREEMENT

UNITBV continues the process of internationalization and fosters the cooperation with other educational institutions of Japan.

A new institutional agreement was signed with Sapporo Gakuin University, Kindai University, Ryokoku University, Kwansei Gakuin University, Meisei University, Nihon University, Otaru University of Commerce, as well as with University of Tokyo - School of Engineering in the month of October.

The Romanian Pavilion within Expo 2025, in Osaka, hosted the signing ceremony for a cooperation agreement between our University and the University of Hyogo (Japan).

The event took place on 4 October, within a ceremony where the agreement was signed by Prof. Dr. Makoto Kosaka, Rector of the University of Hyogo, and Prof. Dr. MD Liliana Rogozea, Vice-Rector of Transilvania University of Brașov. The ceremony took place under Ferdinand Nagy's patronage, as Commissioner General for Romania's Pavilion.

Prof. Dr. Mădălina Rucsanda, Dean of the Faculty of Music, Prof. Dr. Stela Drăgulin, Director of the Music Centre, and the other UNITBV delegation members had by their side Carmen Tămaș, Professor of Japanese culture at the University of Hyogo, who emphasised the importance of the agreement signed by the two institutions.

The event is another instance of enhanced collaboration with prestigious universities around the world, in the field of education, research and innovation, as part of UNITBV's internationalization strategy.

The ceremony was opened by Ferdinand Nagy, the Commissioner General, who highlighted UNITBV's role in promoting authentic values, in creating the framework for the promotion of Romania and Romanian schools, as well as in developing educational, cultural and scientific partnerships.

The ceremony attendees had the opportunity to watch video presentations of the two universities.

The festive moment ended with the signing of the collaboration agreement and an artistic moment offered by Botond Szöcs, Lector Dr. at Transilvania University of Brașov, who gave a piano recital highly appreciated by the audience.

Prof. Dr. MD Liliana ROGOZEA
Vice-Rector for Public Relations

AWARDS OBTAINED BY THE STUDENTS IN ELECTRICAL ENGINEERING AT *ELSTUDIS 2025* INTERNATIONAL STUDENT SCIENTIFIC SYMPOSIUM AND *BACSTUD 2025* INTERNATIONAL SYMPOSIUM

Two international student scientific events took place between 9 and 11 October 2025. The former is *ELSTUDIS 2025* International Scientific Symposium, now in its 4th edition, organised by "Gheorghe Asachi" Technical University of Iași, Faculty of Electrical & Power Engineering and Computer Science, and by the Electrical-Engineering Student League; and the latter is "Brainstorming in the Agora of Student Circles" (*BACSTUD 2025*) International Symposium, in its 11th edition, organised by Agora University of Oradea, in Băile Felix.

Transilvania University of Brașov was represented in Iași by Camelia Moșuț and Florian Emanuel Alecu, 4th-year students in the Electrical Engineering and Computers bachelor's study programme (taught in English), as well as by Bogdan Ioan Oprea, a 1st-year student in the Advanced Electrical Systems master's study programme (taught in English), accompanied by Lect. Dr. Eng. Dan Sorea.

At *BACSTUD*, our University's emissaries were Alexandru Ion Ghinea, a 4th-year student in the Electrotechnics bachelor's study programme, and Pavel Cristian Manea, a 3rd-year student in the Electrotechnics study programme, accompanied by Lect. Dr. Eng. Laura Mihaela Leluțiu.

As regards *ELSTUDIS 2025*, the thematic fields were: Current Career Challenges in Electrical and Power Engineering; Control and Applications in Robotics; Electronic Devices, Machines and

Appliances in Drive Systems; Electricity from Renewable Sources. Energy Applications; Artificial Intelligence in the Electrical and Energy Field; Metrology and Measuring Systems; Advanced Materials in the Electrical Field; Software Applications in Electrical Engineering; Management Systems and Environmental Policies; Modern Techniques in the Electric Power System.

The sections of *BACSTUD 2025* Symposium were: Electrical, Electronic and Power Engineering; Automation, Robotics and Applied Computer Science; Industrial Engineering, as well as Materials and Environmental Engineering; Industrial Engineering and Management.

Once again, our students in Electrical Engineering won awards in both scientific events:

- First Prize, Camelia Moșuț, at *ELSTUDIS*;
- Second Prize, Pavel Cristian Manea, at *BACSTUD*;
- Third Prize, Alexandru Ion Ghinea, at *BACSTUD*;
- Mention, Florian Emanuel Alecu and Bogdan Ioan Oprea, at *ELSTUDIS 2025* and *BACSTUD 2025*.

STUDENT LOG IN AS THE START EVENT OF THE NEW ACADEMIC YEAR, 2025-2026

Transilvania University of Brașov (UNITBV) organised the opening ceremony of the new academic year, 2025 - 2026, on Wednesday, 1 October 2025. After the festivity that took place in "Sergiu T. Chiriacescu" Conference Centre, the students were invited on University Colina Campus to attend *Student Log In*.

This event, already a tradition in the annual agenda of UNITBV events, is a moment eagerly awaited not only by the freshmen, but also by sophomores, juniors and seniors.

During the few hours, the first-year students had the opportunity to learn useful information for their academic journey from their colleagues in senior years, present at the stands of our university's 18 faculties, as well as to visit the stands of the university's student associations and support structures. Last but not least, they could participate in various interactive challenges/contests such as *Treasure Hunt*, *Quiz* and other games. The ones who did the best were rewarded with prizes.

Beside these contests, an artistic programme was also organised on the stage arranged in the hall of the C building on University Colina Campus, which was taken, one after another, by students at the Faculty of Music – *Academic Factory* group, but also by students under the Brașov Students' Culture Club.

The audience enjoyed Bianca Tacea's recital, as well as *One Dream* group's modern dance shows. Moreover, a varied folklore programme was offered by "Lads of Brașov" Student Folklore Ensemble. The event ended with a party and DJ Mix Session.

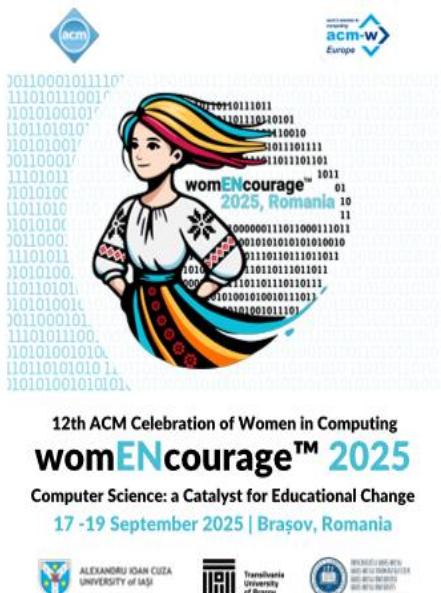

This year, more than 5,300 freshmen stepped in our university, for the bachelor's study programmes, alongside over 2,000 graduate students and 140 PhD candidates, all of them choosing to belong in an academic community acknowledged for the quality of its education and the international openness.

Prof. Dr. Eng. Daniel MUNTEANU

ACM-W EUROPE womENcourage™ 2025 - INTERNATIONAL TRAVELLING FORUM, ORGANISED AT UNITBV

The 12th edition of the international event for the celebration of women's involvement in IT, [ACM-W Europe womENcourage™ 2025](#), took place at Transilvania University of Brașov, between 17 and 19 September 2025, organised in collaboration with "Babeș-Bolyai" University of Cluj Napoca and "Alexandru Ioan Cuza" University of Iași.

womENcourage™ is the initiative of ACM-W Europe to celebrate women's achievements in Computer Science and motivate them to continue their education and career in this field. The event serves annually as a platform for the undergraduate and graduate students, researchers, academics and professionals to present their academic and professional achievements and to share their expertise, thus encouraging the young participants' involvement in IT.

Through the hackathon, poster sessions, workshops, panels, career fair, this year's conference theme, *Computer Science: A Catalyst for Educational Change*, was with the catalyst of relevant solutions for changing the education through cutting-edge IT tools. The involvement and contributions of the over 200 participants, including 90% young women in the IT field, representing 32 countries on all continents, highlighted the importance of an educational environment based on inclusion, acceptance of diversity, gender equality

and creation of opportunities equally addressed to all learners.

womENcourage™ 2025 was a successful edition, enthusiastically supported by the volunteer members of *UNITBV ACM Student Chapter* and by the professional team of colleagues from the Department of Mathematics and Computer Science, as members of the organising committee: Liana Boca and Cristina Păcurar (*Registration*), Maria Nuțu (*Workshops*), Alexandra Băicoianu (*Scholarships*), Ioana Plajer (*Hackathon*), Corina Nănău (*Publicity*), Luciana Majercsik (*Supporters and Career*), Adelina Manea (*Finance*).

We highly appreciate the collaboration with the partners of the event: ACM Distinguished Speaker Program, ARLC Romanian Association of Computational Linguistics, AP-Studio Brașov (photo-video services), Bellman Quotidian (catering services), ARO Palace, Anatoly vocal quintet, *Trio Transilvania* ensemble of the Faculty of Music and *Lads of Brașov* Student Folklore Ensemble.

To an equal extent, we gratefully promote the names of the sponsors who made it possible for womENcourage™ 2025 to be organised and take place in Brașov: BCR Iași, BCR Brașov, Siemens Industry Software, CapGemini Engineering, CANAM, ComputaCenter, Mitel, RebelDot, Kronsoft Development, University of Southampton, FARMEC, Miele.

Lect. Dr. Anca VASILESCU
Co-general Chairperson of womENcourage™ 2025

THE 11TH EDITION OF THE INTERNATIONAL CONFERENCE “COMPUTATIONAL MECHANICS AND VIRTUAL ENGINEERING” – COMEC 2025

This year's edition of *Computational Mechanics and Virtual Engineering* (COMEC 2025) International Conference had a special significance, celebrating 20 years from the inauguration of this traditional event, hosted by Transilvania University of Brașov between 16 and 17 October 2025.

Over the last two decades, COMEC has become a milestone in the field of computational mechanics and virtual engineering, bringing together researchers, professors and specialists from all over the world, in a high-level scientific and interdisciplinarily collaborative setting.

For this anniversary edition, special awards were given to personalities who significantly contributed to the development and prestige of the conference:

- Prof. Dr. Sorin Vlase, Transilvania University of Brașov – in recognition of his visionary initiative to establish COMEC conference in 2005, and of his significant contribution to its growth and international recognition over the past 20 years.
- Prof. Dr. Polidor Bratu, CEO of *Research Institute for Construction Equipment and Technologies* (ICECON S.A.), Bucharest, and professor at “Dunărea de Jos” University of Galați – for his steady support, valuable contributions and active involvement as a guest, mentor and advocate of COMEC throughout its history.
- Assoc. Prof. Peter Bencs, University of Miskolc, Hungary – for his ongoing support, valuable

contributions and involvement as a participant, keynote speaker and supporter, which enriched the scientific quality and international impact of the conference.

- Dr. Phys. Adriana Savin, researcher at the National Institute of Research and Development for Technical Physics – Iași – in recognition of his exceptional scientific contributions and remarkable plenary presentations delivered within the conference in recent years, which have strengthened the scientific prestige of the event.

The festive atmosphere of the anniversary moment was complemented by high-level scientific presentations, valuable discussions and an academic community sharing the same values: excellence, innovation and collaboration.

We thank all participants and guests for their contributions and for the academic spirit that has defined COMEC for two decades. We look forward to meeting again within the future editions, to continue the tradition of performance and international partnership together!

Assoc. Prof. Dr. Eng. Mihaela Violeta MUNTEANU
Prof. Dr. Eng. Maria Luminița SCUTARU
Faculty of Mechanical Engineering

AN INTERNATIONAL CONFERENCE IN THE CITY OF BRAŞOV: *SOUNDSCAPES IN THE BALKANS – RETHINKING HISTORIES, REFLECTING THEORIES AND IDEOLOGIES*

Between 3 and 5 September 2025, the Faculty of Music within Transilvania University of Braşov hosted *Soundscapes in the Balkans - Rethinking Histories, Reflecting Theories and Ideologies*, the 9th edition of the International Musicology Conference, in partnership with the National University of Music, Bucharest, the Union of Romanian Composers and Musicologists, IMS Regional Association for the Study of Music of the Balkans (RASMB) and The International Musicological Society.

The event took place in "Sergiu T. Chiriacescu" Conference Centre of Transilvania University, and the organising committee included Prof. Dr. Mădălina Rucsanda, Dean of the Faculty of Music, UNITBV, Prof. Dr. Nicolae Gheorghită, National University of Music, Bucharest, alongside professors at the Faculty of Music, UNITBV: Assoc. Prof. Dr. Alexandra Belibou, Assoc. Prof. Dr. Noemy Karacsony, Assoc. Prof. Dr. Alina Nauncef, Assist. Prof. Dr. Iuliana Isac, and Adj. Prof. Dr. Ion Negrilă.

The conference brought together musicologists and researchers from our country and abroad (Australia, Greece, England, Macedonia, Austria, Bulgaria, Serbia, Türkiye, Cuba) and took place over three intense days, which were structured into several sessions, under which various topics were addressed and debated – *Rethinking Histories, Culture and Soundscapes in the Balkans, Byzantine and Post-Byzantine Chant, Ethnomusicology and Music and Politics*.

The participants had the privilege of listening to speeches and lectures delivered by prominent guests as *keynote speakers*. We enjoyed the presence of Kate van Orden, professor at Harvard University, USA, chairperson of ISM, John Griffiths, professor at the University of Melbourne, Australia, deputy chairperson of ISM, and Valentina Sandu-Dediu, professor at the National University of Music, Bucharest, and Rector of *New Europe College* Institute for Advanced Studies.

The conference agenda included relevant moments such as *round tables* moderated by Prof. Dr. Valentina

Sandu-Dediu (topic: *The Decisive Impact of Archival Studies on Revisiting the Histories of Romanian Music*) and Prof. Dr. Maria Alexandru, Aristotle University of Thessaloniki, Greece (topic: *Interrelations between Word and Music in Various Traditions of the Christian East and Orient*), recital reading, *Greek Art Song: A Glimpse in Time and Style* – a moment offered by Ioanna Vrakatseli (mezzo-soprano) and Sofia Kontossi (piano).

Apart from the highly interesting discussions, the participants had the opportunity to enjoy a rich artistic programme featuring Romanian folk dances performed by *Lads of Braşov* Student Folklore Ensemble, as well as exceptional musical performances offered by professors and students of the Faculty of Music, UNITBV: Gustav Királyhalmi (piano), Adj. Prof. Drd. Amalia Nicolau (pan flute) and Trio Transilvania, *Anatoly* Quintet, as well as *Codex Ensemble*, consisting of Prof. Dr. Ignác Csaba Filip (flute, artistic director), Assoc. Prof. Dr. Noémi Karácsóny (mezzo-soprano), Assoc. Prof. Dr. Alina Nauncef (violin), Drd. Zsombor Filip (lute), and the students Daniel Mozes (cello), Ariana Modiga (drums), Alexandru Nauncef (violin) and Vlad Nauncef (viola).

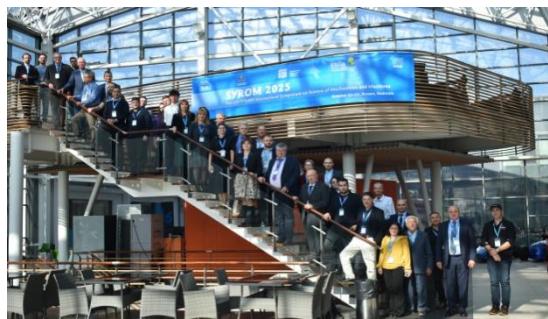

A special moment was the recital of Albena Naydenova (soprano) and Marianne Ronez (viola d'amore) who performed *Reunion*, a music piece composed by Assoc. Prof. Dr. Ana Szilágy, Faculty of Music, UNITBV.

IMS-RASMB 2025 Ninth International Conference has significantly contributed to the investigation and mapping of musical cultures and soundscapes in the Balkans, exploring both historical and contemporary dimensions of the musical phenomenon.

Assist. Prof. Dr. Iuliana ISAC
Faculty of Music

THE 14TH EDITION OF IFToMM INTERNATIONAL SYMPOSIUM ON THE SCIENCE OF MECHANISMS AND MACHINES (SYROM) BRAŞOV, ROMANIA, 23-25 OCTOBER 2025

Continuing a long tradition, uninterrupted for over half a century, the 14th edition of IFToMM *International Symposium on the Science of Mechanisms and Machines* ([SYROM 2025](#)) took place in Brașov, from 23 to 25 October 2025, under the organization of *Renewable Energy Systems and Recycling* Research Centre (RESREC) within the Faculty of Product Design and Environment, in collaboration with Romanian Association for the Science of Mechanisms and Machines (ARoTMM) and Romanian Academy of Technical Sciences (ASTR). This international scientific event enjoyed the patronage of *International Federation for the Promotion of Mechanism and Machine Science* (IFToMM), with the scientific support of *Technical Committee for Linkages and Mechanical Controls*, *Technical Committee for Sustainable Energy Systems* and *Technical Committee for Computational Kinematics* within IFToMM, as well as the scientific support of *European Sustainable Energy Alliance* (ESEA).

SYROM 2025 International Symposium brought together over 90 researchers from seven countries on three continents - scientists, experts and PhD candidates involved in the general field of mechanisms, mechanical transmissions and machines, who disseminated the latest results of their research and exchanged views on the future research directions in this field. We were honoured by the presence of four outstanding professional figures in the field of mechanisms and machines, who delivered exceptional plenary presentations: Prof. Andrés Kecskeméthy (University Duisburg-Essen, Germany), current chairperson of IFToMM, with the presentation "IFToMM – Origins, Activities and Visions of Our Worldwide Community"; Prof. Marco Ceccarelli (University of Rome Tor Vergata,

Italy), former chairperson of IFToMM – "Robotics and Mechatronics, Mechanism Design, Innovation, History of MMS"; Prof. Burkhard Corves (RWTH Aachen University, Germany) – "Past, Current and Future Research Topics in Parallel Robotics with Special Emphasis on Delta Robotics Research at IGMR, RWTH Aachen University", and Prof. Giuseppe Quaglia (Politecnico di Torino, Italy) – "Service Robotics, Robotics for Healthcare, Robotics for Agriculture, Sustainable Development Goals".

All 33 presented papers will be published in a Springer Cham volume entitled *Advances in Mechanisms and Machine Science - Proceedings of the 14th IFToMM International Symposium on the Science of Mechanisms and Machines*, within the series *Mechanisms and Machine Science*, whose editors are Mircea Neagoe, Ioan Doroftei, Erwin Christian Lovasz, ISBN 978-3-032-14022-7. The book presents highly valuable original contributions on topics such as theoretical and computational kinematics, mechanism design, experimental mechanics, dynamics of machines and multi-body systems, mechanisms for biomechanics, mechanical transmissions, micromechanisms, serial and parallel robots, mobile and collaborative robots, medical robots.

We express our gratitude to Transilvania University of Brașov for the logistical support, as well as to the sponsors nVent, Stabilus and REPOM for the financial support of this scientific event.

Prof. Dr. Eng. Mircea NEAGOE
Faculty of Product Design and Environment
SYROM2025 Chairman

THE NATIONAL CONFERENCE ON EDUCATIONAL RESEARCH (CERED 2025), IN THE 11TH EDITION

Between 2 and 4 October 2025, the Faculty of Psychology and Education Sciences hosted the National Conference on Educational Research – CERED 2025, the greatest national event in this field. Organised by the Romanian Association for Research in Education (ARCE) in partnership with our faculty, the conference – now in its 11th edition – brought together researchers, decision-makers and practitioners in a forum for scientific dialogue. The programme combined international perspectives with the national expertise, offering its participants opportunities of professional development in a high-quality scientific setting. Prof. Fabio Dovigo (University of L'Aquila, EERA expert), keynote speaker, presented the paper: *Where is European Research on Inclusive Education Heading? A Topic Modelling Analysis of ECER Abstracts Over the Past Twenty Years.*

CERED 2025 had on its agenda the international symposium *Service Learning as a Transformative Methodology in Higher Education*, with the participation of Assist. Prof. Esther García Zabaleta and Assist. Prof. David Recio Moreno (Public University of Navarre), as well as Prof. Simona Lidia Sava (West University of Timișoara). *Emerging Researchers Conference* (ERC) included training sessions led by Prof. Dragoș Iliescu (University of Bucharest), as well as by Assoc. Prof.

Camelia Truța and Lect. Elena Ungureanu (UNITBV). The panel *University and the Professors' Training* brought together, from the Romanian educational system, Prof. Daniel David - Minister of Education, Prof. Lucian Ciolan (UB), Prof. Romiță Iucu (UB), Prof. Ciprian Ceobanu (UAIC), Prof. Cătălin Glava (UBB), Prof. Ana-Maria Cazan and Assoc. Prof. Daniela Popa (UNITBV).

The five parallel workshops turned theory into practice: *Global Participatory Research* (Prof. Urszula Markowska-Manista, University of Warsaw), *Language Buddy in Action* (Assoc. Prof. Daniela Popa, Lect. Alina Turculeț, Lect. Marius Bazgan), *Visual Methods with Children and Youth* (Prof. Catalina Ulrich Hygum, Lect. Leyla Safta Zecheria, Octavia Bors Georgescu, Lect. Elena Ungureanu), *Positive emotions in Learning* (Prof. Daniel Mara, Lect. Alina Maria Moldovan), and *University Mentorship* (Prof. Mușata-Dacia Bocoș, Assoc. Prof. Mihaela-Gabriela Neacșu, Assoc. Prof. Mihaela Voinea). The eight thematic sections were dedicated to disseminating research results on educational policies, digital technologies, inclusion and creativity in education.

The event ended with the General Assembly of ARCE. Gratitude goes to the speakers who shared their expertise, to all participants for the dynamics of the sessions, to the volunteers for their professional conduct, and to the sponsors who fostered an environment conducive to scientific dialogue and networking. This conference has proved that rigorous educational research is the foundation for the development of the educational system.

Assoc. Prof. Dr. Daniela POPA
Faculty of Psychology and Education Sciences

■ CONTENTS

UNITBV CONFERENCES, AT A NEW EDITION: SCIENCE AND TOURISM – HOW SCIENCE ENHANCES TRAVEL

The sixth edition of the UNITBV Conferences, this high-profile event series, brought up an important topic, in the viewpoint of both researchers and citizens as tourists: *Science and Tourism – How Science Enhances Travel*. Prof Dr. Bianca Tescășiu, along with the moderator, Assoc. Prof. Dr. Dragoș Ioan Tohănean, tried to offer a unique perspective on the tourism industry, highlighting how science can influence the tourists' choices.

During the conference, the participants found out how research and science could contribute to the development of tourism and change the tourists' approach to travel. Concepts such as sustainability, responsible tourism, sustainable local development, permaculture, downshifting, co-creation, e-tourist were brought up for debate. Starting from the idea that the access to information offers the general public the opportunity to understand concepts, the speaker and the moderator tried to show the major significance that science can have for tourists, from two perspectives:

■ in terms of the opportunity of getting to better know the tourism market – through research results that can provide both information about the opinions of the tourists, tourism providers or authorities, as well as information about the new forms of tourism and their impact on the tourism industry;

■ in terms of the role of science for the development of tourism – by integrating scientific progress into the tourism product, which results in the emergence of new types of tourism products.

The conference also enjoyed the contribution of young graduate and doctoral students whose scientific concerns relate to tourism – Ioana Iulia Niță (1st-year doctoral student in the field of Marketing), Andrea Caridad Bringas Heredia (2nd-year CHORAL doctoral student) and Alexandru Homeghi (2nd-year graduate student in the Tourism Business Administration programme).

2025 EUROPEAN DAY OF CIVIL JUSTICE – LAW IN THE SERVICE OF THE CITIZEN AND DEMOCRACY – LESSONS OF THE PAST, CHALLENGES OF THE PRESENT AND FUTURE TRENDS

The European Day of Civil Justice, established in 2003 by the Council of Europe and the European Commission, is celebrated every year around 25 October, and it is a good opportunity to highlight the role of justice as a service for the citizens.

In this context, Brașov Court, in partnership with the Faculty of Law within Transilvania University of Brașov and Brașov Bar Association organised, on 24 October 2025, in Astra Cinema hall, the conference symbolically named *Law in the service of the Citizen and Democracy – Lessons of the Past, Challenges of the Present and Future Directions*.

The event brought together magistrates, lawyers, academic teaching personnel and students in an interprofessional dialogue focused on the lessons learned from the past, on the good practices of the present, and on the integration of the changes that can ensure a modern justice system in a democratic society.

Thus, within the first panel *Path of Justice to Democracy – Lessons of the Past*, the former magistrates and lawyers, in addition to the presentations of great historical depth, recalled their experiences, illustrating how professional realities were influenced by the institutional and social context of the time.

The second panel, *Law in the Citizen's Service – Best Practices for Efficiency and Transparency*, emphasised on the one hand the national judge' role in the European judicial area, and on the other hand the legal instruments that enshrine, at international level, the lawyer's right to defend without fear and pressure, in a climate of independence and professional safety.

This panel also provided an opportunity for reflection on the increasingly important role of institutional communication, especially in the context of the values and standards promoted at European level.

The third panel, *Tomorrow's Justice: Ethics, Education and Transparency in the service of Democracy*, aimed at illustrating how the judicial system adapts to future challenges through transparency, technological innovation and civic engagement.

In this regard, digitalization has been shown as an essential direction for streamlining trials and, in general, judicial processes.

Legal education for citizens, deemed a pillar of any functional democratic society, plays an important role in strengthening democracy. The public's information on the rights, obligations and mechanisms of the judicial system fosters responsible civic participation, diminishes misunderstandings on the act of justice, and enhances a genuine judicial culture.

In conclusion, this festive moment was a moment of professional reflection on the evolution of justice, structured around three complementary directions, starting from the one which, by capitalising on the lessons of the past, helps reinforce the current guarantees of the judicial act and responsibly orient the system towards the challenges of the future.

Lect. Dr. Georgeta-Bianca SPÎRCHEZ
Faculty of Law

■ CONTENTS

ACADEMIC PERSPECTIVES ON CONTEMPORARY PSYCHOLOGY – COLLABORATION BETWEEN FPSE AND TREI/PUBLISHING HOUSE

Starting on 7 October, the Faculty of Psychology and Education Sciences organised three other events within the "PSI Week", in partnership with TREI Publishing House and Cărturești Bookstore in the Council Square. During the evenings of Tuesday, Wednesday and Thursday, the faculty's teaching personnel, alongside psychology specialists gave presentations and held dialogues on various topics of great relevance:

■ *From Early Needs to Family Dynamics: Child Rearing in Today's Context*

Ioana Georgiana Mărcăineanu offered valuable benchmarks to parents and professionals, with an emphasis on the fulfilment of the children's and teenagers' needs – from safety and emotional support, to the balanced enhancement of their potential. Moreover, she highlighted the essential role of a safe, supportive and harmonious environment for their development.

■ *Attachment - How It Forms and What Its Role Is Throughout Life*

Laura Teodora David, using a clear and accessible language, but building her presentation on scientifically validated theories and recent research, presented the main concepts of the attachment theory, as well as intervention methods applicable in a broad framework. She foregrounded withal the need to value the healthy relational models and to change the dysfunctional ones, highlighting the view on attachment not only as a structure determined by the early relationships with

one's parents, but also as a dynamic resource, essential for ongoing personal development.

■ *How to Break the Cycle of Drama – From Repetitive Conflicts to Real Connections*

Daniela Popa brought up the overcoming of repetitive relationship patterns likely to sabotage interpersonal bonds, highlighting the ways to build real and lasting relationships. She analysed the psychological mechanisms underlying the "drama on repeat" concept, and proposed effective strategies for turning conflicts into opportunities of rapprochement and emotional response adjustment, with a view to cultivating relationships conducive to personal development and inner balance, instead of entailing exhaustion.

As in previous editions, the events unfolded in a relaxed and intellectually boosting atmosphere, in which readers of all ages, students, practicing psychologists and teachers gathered around ideas and authentic dialogue. The participants showed deep interest in the proposed topics, reflected in the questions addressed to the specialists, the nuanced interventions and the active involvement in the evening debates. The lively and reflective participation turned these events not only into opportunities to disseminate psychological knowledge, but also into genuine meeting spaces between experience, reflection and scientific curiosity.

Co-funded by
the European Union

A partner meeting within the Erasmus+ project entitled *Social Entrepreneurship Ecosystems Network (SEEN)* took place on 10 October 2025. SEEN project is funded through the financing contract no. 2024-1-BG01-KA220-HED-000255491.

The project coordinator is the Technical University of Varna, Bulgaria; and the consortium includes the following partners, alongside our university: Jaume I University, Castelló de la Plana, Valencia, Spain, the Bulgarian Business Forum and "Dare to Develop" Academy of Bulgaria, "Innovation Education Lab" Association of Romania, Projects for Utility and Humanity (PUHU) company of the Netherlands", and Efekto grupe" company of Lithuania.

The meeting on 10 October 2025 was attended by representatives of all project partners. Within the project, our university has been assigned the development of a pilot course, including its support

materials, in order to boost and educate, in young people, especially students, the entrepreneurial spirit.

The pilot course structure includes the basics of entrepreneurship, artificial intelligence tools for entrepreneurship, research project management, human skills for entrepreneurs and team management.

The UNITBV team members are Assoc. Prof. Dr. Dana Lupșa Tătaru and Lect. Dr. Camelia Mîzgaciu - Faculty of Economic Sciences and Business Administration, Assoc. Prof. Dr. Alexandra Băicoianu - Faculty of Mathematics and Computer Science, Assoc. Prof. Dr. Mihaela Voinea and Assoc. Prof. Dr. Daniela Necșoi - Faculty of Psychology and Education Sciences, Drd. Matei Debu and Prof. Dr. Eng. Mihai Ivanovici - Faculty of Electrical Engineering and Computer Science.

Prof. Dr. Eng. Mihai IVANOVICI
SEEN project partner officer

NSIS PROJECT MEETING AT THE UNIVERSITY OF DRESDEN – INNOVATION, COLLABORATION AND ACADEMIC INSPIRATION

From 16 to 19 September 2025, the University of Dresden hosted the meeting of the didactic and scientific workgroup (DSWG) within the international project *Developing Information, Research and Digital Skills for Business, Innovation and Entrepreneurship in India, Sri Lanka and Nepal* (NSIS), under contract no. ERASMUS-EDU-2024-CBHE-STRAND-2 101179133.

The event brought together professors, researchers and international partners in a setting dedicated to the exploration of the latest trends in digital education and entrepreneurial training.

The participants discussed innovative teaching methods, the development of open educational resources and the integration of digital skills into the curriculum.

A special moment was the visit to the Library of the University of Dresden, a facility redefined as a centre for academic innovation, which includes, in particular:

- Scanning booths for mobile document digitization;
- Library of things – cameras, tools and equipment available for loan;
- Reading and exercise areas – combining study with physical well-being.

The NSIS meeting has strengthened international collaboration and has offered a fresh perspective on how university facilities can support both intellectual and personal development. The project still builds bridges between continents, promoting inclusive and innovative education.

BLOCKCHAIN TECHNOLOGY IN SUPPORT OF THE CIRCULAR ECONOMY

Transilvania University of Brașov is a partner in the international project *RockChain* – *Transversal Technological Skills for the Ornamental Rock Industry Focusing on the Applicability of Blockchain in a Circular Economy* (2023-1-DE02-KA220-ADU-000166863), co-financed by the European Union through the Erasmus+ programme, now in the final stage of development and implementation. In the 21st century, digital technologies underlie economic and social development, and their adoption in traditional sectors, such as building stone industry, is becoming essential for the transition to a sustainable economy.

RockChain project addresses this challenge by creating an innovative educational and professional platform that integrates technologies such as *Blockchain*, *Internet of Things (IoT)* and *Big Data* for waste management and traceability of materials in the building stone industry. The initiative targets the professionals, but also the students, offering them digital tools and interactive educational materials that foster the required skills necessary in digitizing and greening industrial processes. The project mainly aims at developing a transparent and decentralized document tracking system covering the entire waste management process, at raising awareness on the importance of circular economy, and at encouraging entrepreneurship in the field of waste management and Blockchain technology. The project brings together four European partners with complementary experience: Deutscher Naturwerkstein-Verband e.V. (DNV) – Germany (project leader), Centro Tecnológico del Mármol, Piedra y Materiales (CTM) – Spain, Transilvania University of Brașov – Romania and Klesarska škola – Croatia.

The inaugural meeting, held at Parque Científico de Murcia, in November 2023, established the strategic directions for the implementation of a circular economy system for the natural stone industry. During the discussions, the partners exchanged ideas on the integration of the Blockchain technology into the

manufacturing and recycling processes, and defined the structure of the activities, the measurable objectives and the dissemination plan. After one year of implementation, the project team met at Klesarska škola of Pučišća (Croatia), to develop a common European curriculum dedicated to waste management, as well as interdisciplinary training materials, and an interactive Blockchain-based e-Learning instrument for the circular economy.

The final meeting, organised in Aschaffenburg, October 2025, marked the formal closure of the project. The partners presented the final results, assessed the pilot course and international seminar, discussed the future directions of cooperation, and analysed the educational, scientific and technological impact of the conducted activities.

The UNITBV team played an active role in developing the educational resources and disseminating the results, publishing four scientific articles in international journals, and participating in two international conferences. These activities strengthened the international visibility of the project, promoted interdisciplinary collaboration, and contributed to the achievement of the Erasmus+ programme goals.

Through this initiative, UNITBV helps develop innovative European solutions to the challenges of digitalization, waste management and green transition, while strengthening the international partnerships in the fields of research, vocational training and educational innovation.

CHALLENGES OF THE JUNIOR YEAR

The first study year is not only the beginning of a new academic stage, but also a period of self-discovery. Between excitement and insecurity, between curiosity and homesickness, every student finds his/her own pace. In order to support the students in the process of adaptation to this new context, [The Career Counselling and Guidance Centre \(CCOC\)](#) organised, on 22 October, the workshop "Challenges of the Junior Year – A Practical Guide to Adaptation", a meeting dedicated to exploring the specific changes, emotions and resources of the transition to academic life.

During the meeting, one of the central reflections was the idea that adaptation unfolds in natural steps – from uncertainty to clarity, from effort to balance – a path that everyone travels at their own pace.

Linia adaptării

The workshop became a space for authentic dialogue, where the students talked about the emotions of the beginning, about expectations, fears and first successes. The meeting encouraged honesty and sharing, and proved that vulnerability could be a starting point for growth. The activity assumed that adaptation was a natural process, involving adjustments at the academic, emotional and social levels – a balance that is built over time, through learning, awareness and mutual support.

Through self-awareness exercises and group dialogue, the participants reflected on how the student's role changed as against the former pupil's one: from a structured framework, with clear rules and constant supervision, to a context based on autonomy, responsibility and self-organization. The discussions dwelled on the importance of time

planning, stress management and supportive relationships between peers and professors alike.

The emphasis was withal placed on understanding and accepting one's own emotions – from homesickness and a feeling of being overwhelmed, to curiosity and the zest for discovering a new rhythm of life. The participants identified useful strategies for maintaining their balance: to form healthy routines, to take care of themselves, to cultivate self-compassion and to capitalise on the resources offered by the university, including CCOC's counselling services.

The meeting ended in a warm atmosphere, with messages of encouragement and the shared belief that all students eventually find their adaptation pace, and that the university provides the right setting for turning the challenges of the beginning into an experience of growth and maturation.

Every beginning brings along anxiety, but also a new force of adaptation. With the proper support and confidence in his/her own resources, any student can turn the first year into a story of boldness and discovery.

A STUDY VISIT TO BRAŞOV - GHIMBAV INTERNATIONAL AIRPORT

The students in the new master's programme Aviation Engineering and Management (taught in English) within Transilvania University of Brașov, accompanied by a group of professors, have recently made a study visit to Brașov-Ghimbav International Airport.

The event served as a valuable opportunity to enhance their theoretical knowledge through direct contact with the infrastructure and operations of a modern airport. During the visit, the participants were guided by a team of passionate professionals of the airport, who presented them the technical facilities, the air traffic management systems, the security and logistics procedures, and who told the visitors all about the challenges and beauty of their work.

The students had the chance to watch the activities in the operating area and passenger terminal, and thus to understand the complexity of the processes that ensure the efficient operation of an international airport, while enjoying a real-life experience.

The master's study programme Aviation Engineering and Management (taught in English) is a recent initiative of the Department of Engineering and Industrial Management, within the Faculty of Technological Engineering and Industrial Management, which has stirred a high interest since its very launch, confirming the need for specialization in this dynamic field. With a curriculum adapted to the demands of the aeronautical industry and an interdisciplinary approach, this master's programme had a large number of candidates in the July 2025 admission session, and enjoyed the appreciation of both students and economic partners.

The practical experience strengthened the connection between the academic environment and industry, contributing to the formation of an applied perspective on the field of aviation. The visit was appreciated by both students and professors, and is another example of good collaboration between the university and the local institutions.

NEW TALENTS IN THE TEAM OF RADIO CAMPUS TRANSILVANIA

Over the years, at Radio Campus Transilvania, the students' voices could be heard ever more clearly and loudly, day after day. This was possible due to several committed young people who succeeded in making their dreams come true. Nevertheless, our dream doesn't stop here! We want to offer the UNITBV students the chance to develop creatively and professionally alike, in a dynamic but also welcoming team. Therefore, we launched a new wave of recruitments in late September.

The recruitment process began with an intense online promotional campaign. We made a brief and fun presentation of all our departments (technical operations, moderation, photo-video, social media, graphic design and redaction), through thematic photoshoots, promotional videos, posters and displays, to attract future volunteers. Our enthusiasm spread quickly, and the news reached all the campus.

Shortly after, the opening of the new academic year took place and brought along the event dedicated to the first-year students, namely: *Student Log In*. As every year, we attended this event, with the mission of bringing the student radio to the freshmen's attention. Right after the closure of the event, the registrations swiftly escalated.

At the end of registrations, we counted over 150 students who had expressed their desire to be part of Radio Campus. Thus, this high interest was of great significance to us, and we revelled in the interest shown by the applicants.

Once the stage of applications over, next came the real challenge: the interviews. Each candidate had a chance to introduce him/herself, talk about his/her motivations, and prove that s/he belongs in the university's radio station. Later, the finishers also took a practical test specific to the department they applied for.

It was an intense period for the radio station's members, but the energy, eagerness and talent in our future colleagues' eyes instilled in us the responsibility towards them and the motivation to be ever better.

Finally, the long-awaited moment arrived, namely the first full-team session. The room filled up in no time, and 60 curious eyes were watching the hustle and bustle that had arisen around them. During the meeting, the new colleagues met the team they would work with from now on, and were enthusiastically welcomed into the "RCT world".

Thus, Radio Campus Transilvania reinvents itself! We look forward to evolving together, learning from each other, and taking the radio to the pinnacle of success.

"TOGETHER FOR WOMEN'S SAFETY" MARCH

The third edition of "Together for Women's Safety" march, organised at national level for over 10 years by the Network for Prevention and Combating of Violence against Women (VIF), took place in Brașov, on 18 October 2025.

The march through Brașov was organised by *Alternative Step* Association, a VIF network member, with the Faculty of Psychology and Education Sciences, the Network of Professionals in Preventing and Combating Domestic Violence, and "I Will Also Succeed" Winner Network as its partners and co-organizers.

Its manifesto included three essential elements:

- Overt solidarity with the women and girls who are victims of violence.
- Support for the amendment of the legislation on the prevention of femicide and its preceding violence, so that in all cases of violence against women, the risk should be timely assessed and identified, and the authorities could order protective measures beforehand.
- Promotion of the education on gender equality in order for it to be introduced into the pre-university curricula.

The march was attended by 1,200 persons - youth, students, teachers, women still facing or having

escaped violence, professionals in specialised intervention and assistance services, but also by a great number of local people who dream of a world where girls and women live safely, and where gender equality and respect for the women's rights are core values.

The students of the Faculty of Psychology and Education Sciences were actively involved both in the preceding organizational activities and in the actual march, voicing its message of solidarity "None defeated! None forgotten! None less!" The students have thus learned what it means to support social causes and get involved in the community, where education, awareness and responsibility are needed.

CHAMBER JAZZ @ TRANSILVANIA UNIVERSITY: CANTICA PROFANA

The tenth season of Chamber Jazz @ Transilvania University was opened with a special concert, performed by Lucian Ban, Mat Maneri, Marco Colonna and Gerald Cleaver. The audience could revel in the peasants' voices recorded by Béla Bartók more than a hundred years ago in Transylvania's villages, reimagined through jazz by a quartet of famous musicians, in Studio 181 room, Rectorate building, on 21 October.

The Romanian-American pianist Lucian Ban, born in Cluj, Romania, the American violist Mat Maneri, the Italian clarinettist Marco Colonna, and one of the leading contemporary jazz drummers, the American Gerald Cleaver came together and, during a five-day residence in Transylvania's heart, rediscovered through jazz and improvisation the essence of the songs collected by the famous composer.

The tandem of the Romanian-American pianist Lucian Ban and of the American violist Mat Maneri is known and appreciated all over the world for the deep melange between folklore and improvisation, for the recontextualizations between classical music and jazz, but also for the strive to outline an ideal of chamber jazz. Financial Times describes "the complex interweaving between the unique sound of Mat Maneri's viola and Lucian Ban's amply resonant piano as a delight of contemporary jazz for more than a decade".

Gerald Cleaver, born in Detroit, is appreciated for his versatile style that naturally blends the jazz tradition with avant-garde improvisation. He has worked with a wide range of musicians such as Henry Threadgill,

Roscoe Mitchell, Matthew Shipp, William Parker and Charles Gayle.

Marco Colonna, born in Rome, 1978, is a world-renowned musician, multi-instrumentalist, composer and improviser, particularly famous for his mastery of the bass clarinet. His musical style is at the intersection of jazz, free improvisation, avant-rock and contemporary musical language, being often described by the critics as "fascinating" and "ingenious".

All along his career, for about two decades, Colonna has collaborated with many prestigious musicians, such as Alexander Hawkins, Agustí Fernandez, Andrew Cyrille, Roberto Ottaviano and Evan Parker, sealing his reputation as an eclectic and creative artist.

THE MEADOW. REIMAGINING THE COMMUNITY CENTRE OF FUNDATA

In the month of October, the Multicultural Centre hosted *The Meadow. Reimagining the Community Centre of Fundata*, an exhibition curated by Irina Botea Bucan and Jon Dean. The exhibition presents the results of the projects which were developed for two years in the village of Fundata, in the search of answers to the question: how this centre can become once again an important place for the community, a space for both collective and individual multidimensional development.

The Community Centre of Fundata was reactivated through interdisciplinary workshops, visits in the area, companion films and *in-situ* installations. The

co-creation activities with community participation included: mixed visual arts techniques, discussions, storytelling, embroidery, contemporary dance, illustration, fanzine production, cyanotype painting, music composition, sound editing, singing lessons, 16-millimeter film shooting, photography, collage, collective story writing and theatre production.

The exhibition draws its title from the children's gesture of picking up flowers on the meadows of Fundata, in order to offer them as gifts to the artists holding the workshops, as well as from the moments of delight, exchange and shared learning occasioned by their watching and collecting medicinal plants together with the community's different generations.

Ulrich Behr, Ana Barbu Uzura, Irina Botea Bucan, Laurențiu Coțac, Romeo Csató, Jon Dean, Maria Doni, Iuliana Dumitru, Ionela Ghețe, Mane Hellenthal, Bogdan Iancu, Pavel Iacob, Jane Jerardi, Ana Kun, Cosmin Manolache, Diana Miron, Katia Pascariu, Lila Passima, Leandro Pisano, Elena Vlădăreanu are the artists involved in the projects conducted in Fundata, who honoured with their presence the exhibition, workshops and meetings hosted by the Multicultural Centre in the month of October.

SUCCESSFUL ALUMNI – LOREDANA VASILE

Loredana Vasile is an alumna of Transilvania University of Brașov. Between 2002 and 2006, she attended the Faculty of Economic Sciences and Business Administration, study programme of International Economic Relations, which she graduated from with an average grade of 9.80 in the bachelor's final examination.

During her student years, Loredana lived a unique experience within the Erasmus programme, thus attending the courses of the Polytechnic University of Valencia, Spain (EPSA Alcoy). Here she delved into the study of human resource management, regional economics and financial systems. The acquired expertise gave her a valuable global perspective, and led her to pursuing a career in the field of international business. The Spanish language and Iberian experience (along with her good level of English and French) proved to be a decisive asset in her employment by the prestigious company Procter & Gamble, Procurement department, in Bucharest, right after obtaining her bachelor's degree.

Loredana Vasile has conducted her professional activity within Procter & Gamble (P&G) ever since. She has had an exceptional career progression, passing from local coordination roles to European strategic positions. The positions she filled along the way include Europe Source2Pay Change Management Leader, Senior Analyst, Purchases Capability and Strategy, and Project Leader for projects of digital transformation and procurement optimization. She also worked a long time as Senior Procurement Manager, thus managing external resources on several European markets.

In these roles, Loredana stood out by coordinating international teams, by collaborating with external

partners and suppliers, as well as by interacting with the top management, thereby contributing to the company's enhanced efficiency.

She currently fills the position of IT Application Manager, and technically supervises the global platform that P&G company has chosen for archiving all its documentation used in the production areas, but also in the research-development and quality assurance departments.

Apart from the professional activity, Loredana got permanently involved in volunteering and non-formal education, collaborating with organizations such as *Together at School*, *Youth Association ART Perspective* and *Habitat for Humanity*. Through these programmes, she supported educational and cultural initiatives for youth, as well as the participation in the mission of raising the living conditions in low-income communities.

The colleagues describe her as a dynamic, solution-oriented person with strategic thinking, which qualities have earned her the appreciation of all teams she has worked with. On personal level, Loredana started and raises a beautiful family that she takes pride in.

Today, Loredana Vasile is a model of successful alumna for UNITBV, who proves that passion, commitment and professionalism can pave the way to consequential accomplishments and significant achievements in the business environment. We wish her even more fulfilment, personally and professionally alike.

Taisia JALAU, internship graduate student
